Polish Windows specialise in quality solid wood, aluminium and wooden-aluminium windows, as well as a range of top quality exterior and interior doors. Because we value quality, aesthetics and durability, our precision engineered timber windows and doors are designed and manufactured to meet and exceed the demanding standards of our customer.

We approach each order on an individual basis, tailoring the products to meet the unique requirements and expectations of each customer.

The quality of our windows and doors is guaranteed due to the high-calibre business partners we work with including:

- fittings from world famous brands such as Roto NT, Siegenia, IPA and Wink-Haus;
- glass pane sets from Pilkington and Sant Gobain;
- laquers and paints from Glasurit, Gori and Sikkens;
- door hinges and handles from Simonswerk and Hoppe.

Each product is manufactured in strict accordance with the customer's specifications and their choices in material, size, colour, shape and glass type. Standard pane sets have a K value of 1.1, but we also offer a range of glass types that includes laminated safety glass, tempered glass, bullet-proof glass as well as tinted and UV resistant glasses.

Our range of designs can be used in both contemporary and traditional residential and public building constructions, as well as during the renovation of old buildings, to ensure the maintenance of historical features.

We offer excellent value for money and can offer products that are typically to 30% cheaper than our competitors, without compromising on quality or finish.
